

# PETER STONE BROWN

---

May 27, 1999

Hi Jeff,

Here is a copy of my CD (hope you dig it) and a recent field recording :-)  
done by one CP Lee (originally on mini-disc) at the King's Arms in Salford.  
There is a tiny bit of guitar distortion which I'm not sure was the sound  
system (didn't sound that way at the time) or whether Chris dubbed my  
copy too loud. Anyway, it does contain the only known duets of Chris and  
me on the Carter Family's "Engine 143" and "Mole In The Ground," and  
Chris doing a weird Irish song, as well as 3 Bob tunes I did especially for  
Chris and Alan Fraser who was in the audience that night.

Noting your good taste in music and apparent interest in songwriters, as  
soon as I get a chance I'm gonna also make you a tape of some stuff you  
can't possibly have that I think you'll like.

Thanks greatly for the videos and for doing them so fast!
